

## BRYAN / COLLEGE STATION AREA INFORMATION – 2005 DATA

The following 2 tables provide information for 5 law enforcement agencies, taken from data self-reported by each agency. The tables are divided into 3 sections:

- The first section has 2 questions that address each agency's required compliance with the racial profiling law. *The answers to these questions should be **yes**.*
- The second section (in orange) has 2 questions that address each agency's non-required implementation of smarter policing practices. *Ideally, the answers to these questions would be **yes**.*
- The third section has 4 questions that address each agency's consent search practices. *Ideally, the answers to these questions would be **no**.*

If an agency's "answers" are not what we advise they be, it may be due to difficulties complying with the data collection and reporting provisions of the law. For suggestions that may help to address these problems, please read our report recommendations.

***The following law enforcement agencies are included in this fact sheet:***

Bryan Police Department  
Buffalo Police Department  
College Station Police Department  
Hearne Police Department  
Huntsville Police Department

### **Major Findings:**

- All 5 agencies reported all Tier 1 data elements
- 1 of 5 agencies did not break out all Tier 1 data elements by race
  
- 4 of 5 agencies provided additional, non-required data elements information
- No agencies included specific language about consent searches in their racial profiling policy
  
- 4 of 5 agencies had a greater likelihood of consent searching Blacks than Anglos in 2005
- 3 of 5 agencies had a greater likelihood of consent searching Latinos than Anglos in 2005
- 1 of 5 agencies conducted more than 2 consent searches per 100 stops (the state average)
- 4 of 5 agencies had consent searches make up more than 33% of all searches (the state average)

	Bryan Police Department	College Station Police Department	Hearne Police Department
